Top 10 Manufacturers by Brand Portfolio

Registered Brands by Dosage Form (Top 10)

Catalog Split: Allopathic vs. Herbal

Key Market Takeaways

- The Top 10 manufacturers control 34.1% of the national catalog, while the Top 50 firms hold 74.2%.
- 74.0% of all registered medicines compete in hyper-crowded generics (11+ manufacturers), compressing the median unit price to ৳8.00.
- Standard Tablets (9,329) and Capsules (1,997) represent over 52% of all products due to low manufacturing barriers.

% Monopoly Generics

32.6%

Generic Molecule	Drug Class	Primary Clinical Indication
Artemether	Anti-malarial drugs	Schistosomiasis
Benzocaine + Camphor + Methanol + Phenol	Topical Local Anesthetics	Toothache
Benzyl Alcohol	Other scalp preparations	Pediculosis capitis
Betamethasone + Gentamicin	Other Topical corticosteroids	Psoriasis
Butoconazole Nitrate	Drugs used in Vaginal and Vulval condition	Vulvovaginal candidiasis
Cefoxitin	Second generation Cephalosporins	Urinary tract infection
Cefpirome Sulphate	Fourth generation Cephalosporins	Susceptible infections
Cinacalcet	Calcium Regulator	Secondary hyperparathyroidism
Cinchocaine Hydrochloride	Local & Surface anesthesia	Surface anaesthesia
Doxylamine Succinate	Sedating Anti-histamine	Watery eye

Top Drug Classes with Single-Supplier Monopolies

Strategic Takeaways

- **White space**: 50 generics have no registered brand. → Fast-entry targets for new entrants.
- **Monopoly niches**: 1 in 3 generics has a single supplier, mostly vaccines, oncology and specialty topicals. → Second-to-market opportunity for firms with sterile or biologic capability.
- **Crowded commodity market**: About 3 in 4 brands compete in just ~300 generics. → Launch only with a differentiated form (sustained-release, inhalation, injectable).
